FUND INFORMATION

Fund Name	PERFORMA BALANCED CROSS ASSET FUND
Fund Type	Growth
Fund Category	Hedge Fund / Mixed Assets (Wholesale)
Investment Objective	The Fund aims to achieve medium to long term capital growth from absolute returns.
Benchmark	<p>The total returns (the returns net of dividends distributed and fees where applicable) of an equally weighted portfolio of the iShares Core Growth Allocation ETF (AOR), Standard & Poor Depository Receipts S&P 500 ETF (SPY) and IQ Hedge Multi-Strategy Tracker ETF (QAI) rebalanced daily at zero trading cost:</p> <p>$R_{\text{Benchmark}} = 1/3 \text{ iShares Core Growth Allocation ETF (AOR)} + 1/3 \text{ SPDR S\&P 500 ETF Trust (SPY)} + 1/3 \text{ IQ Hedge Multi-Strategy Tracker ETF (QAI)}$</p> <p>where "R" denotes total returns and "x" denotes "multiplied" or "times".</p> <p>Investors should note that the Manager's investment objective is capital growth through absolute returns and is not managing the Fund with the objective of outperforming the reference benchmark or any benchmark. The Manager's investment philosophy is that the Fund is to be managed free from benchmarks from the perspective of the investment objective as the Manager is not seeking to outperform the referenced benchmark.</p>
Distribution Policy	The Fund is not expected to make distributions.

	<u>31 March 2022 (%)</u>
Equity & ETF	100
Unit Trust	0
Cash "net" & money market	0
Total	<u>100</u>

Strategies Employed

The Fund maintained its objective of providing its investors with medium to long term capital growth from absolute returns.

To meet the Fund's objective, the Manager maintained the strategies employed to invest in listed collective investment schemes (such as exchange-traded funds ("ETFs")) and exchange-traded notes ("ETNs") to gain a diversified exposure in multiple global asset classes and investment strategies, including but not limited to equities, fixed income, real estate and infrastructure assets, natural resources, carbon credits, precious metals, multiple asset class volatility, currencies, private equity replication strategies, absolute return or liquid alternative hedge fund strategies and digital assets

The Fund maintained its investment strategy which involves employing a global multiple asset or cross-asset and strategic asset allocation framework, combined with tactical asset allocation overlays to enable a more active or dynamic asset allocation strategy, with the aim to generate: (1) higher risk adjusted returns, (2) lower correlation to equity markets and (3) greater diversification benefits than a passive asset allocation (and less active asset allocation) strategies and/or other funds with less or no exposures to global multiple assets and investment strategies.

The Manager maintained its investment strategy of implementing a multiple asset long-short approach with the use of leverage* by investing in ETFs and ETNs to enable the Fund to gain exposure into multiple global asset classes and investment strategies, which may include but are not limited to: 1. equities, 2. fixed income, 3. real estate and infrastructure assets, 4. natural resources and carbon credits, 5. precious metals, 6. multiple asset class volatility, 7. currencies, cross currencies, foreign exchange related instruments and/or cash, 8. private equity replication strategies, 9. absolute return or liquid alternative hedge fund strategies, 10. digital assets exposures, and their related instruments and derivatives.

Market Review –

Global equities (ACWI) were weaker in the first quarter of 2022 returning -4.64% on lower growth expectations from Russia’s “military operations” in Ukraine and expectations of a more hawkish US Federal Reserve. Growth stocks (IVW) and Smaller cap stocks (IWM) underperformed as a result returning -7.84% and -7.93% respectively. Global Infrastructure and Value stocks outperformed closing the quarter with positive returns of +6.52% and +0.31% respectively.

In Bond markets, bond yields rose sharply with bond prices ending lower in the quarter (bond prices and yields move in opposite directions) with the US 10-year Treasury yield increasing from 1.51% to 2.35% and the 2-year yield rising from 0.73% to 2.33%. Bond markets generally underperformed Equities with both US government bonds (IEF) and US corporate bonds (LQD) ending the quarter with negative returns of -5.85% and -7.54%. Bond markets were surprised by relative hawkishness of central banks as markets priced in a faster pace of monetary normalization

Commodities (DBC) achieved a strong return of +27.28% in the first quarter of 2022 led by higher energy and wheat prices on fears of supply constraints as a result of Russia’s “military operations” in Ukraine.

Investment Outlook

The Fund's investment strategy involves employing a global multiple asset or cross-asset and strategic asset allocation framework, combined with tactical asset allocation overlays to enable a more active or dynamic asset allocation strategy; the strategic asset allocation framework employed by the Fund is based on leading United States university endowment

funds such as Yale and Harvard universities which are characterized by relatively lower allocation to traditional asset classes (equities, fixed income instruments and cash) and a relatively higher allocation to a large number of alternative investment classes including hedge fund, absolute return strategies, private equity and other asset classes such as natural resources and real assets like real estate and infrastructure assets. The Fund may employ dynamic asset allocation within the above mentioned cross assets and investment strategies, with the goal of adapting to the highest risk adjusted asset allocation in the current market and economic regime as assessed by the Manager. The medium to long term outlook for the Fund continues to be positive given its focus on diversified multiple asset exposures through strategic asset allocation combined with tactical asset allocation overlays. Moreover, the use of long-short strategies combined with leverage can improve risk adjusted returns and help mitigate drawdowns in asset markets. It is important to note, however, that investors are recommended to hold investment in the Fund over a longer time period of between 5 years to 7 years as the shorter term performance of the Fund can be uncertain. Risks include non-trending or whipsaw asset markets and unforeseen events which may impact of the performance of multiple asset portfolio with long-short strategies and leverage employed.

The outlook for global markets are dependent on economic policy with a particular emphasis on the US Federal Reserve which is reducing asset purchases and guiding for further interest rates increases in 2022 after significant fiscal and monetary stimulus in the 2020/ 2021 period in response to Covid related challenges. Economic growth and earnings momentum are now slowing with recession risks increasing amid high valuations in US equities. Key risks include the risk of policy errors with the US Federal Reserve potentially either raising interest rates too much and too quickly or not raising interest rates quickly enough now and having to raise interest in the future much more quickly and in larger amounts. Geo-political risk premiums may also increase given increased tensions in Europe/Russia as well as in Asia. After a period of lower volatility and dis-inflation, the outlook is for higher levels of volatility and more inflation as economies re-open and policy makers attempt to normalize monetary and fiscal policy. We believe that our multi-asset approach with ability to hedge can outperform traditional investment strategies like a 60% equities/40% bond fund (AOR) which returned -4.69% for the quarter.
