Strategies Employed

The Fund seeks to generate attractive income returns by investing into the Target Fund.

The Fund will invest at least 90% of its NAV into units of the Target Fund. The Fund's remaining NAV will be invested into liquid assets.

The Target Fund's objective is to provide monthly income returns from a diversified portfolio of debt securities including asset backed business loans, director guaranteed business loans, and senior loans to non-bank lenders secured against a loan portfolio that provide regular income and capital stability. The Target Fund will work with marketplace and peer-to-peer lenders who lend to businesses including small and medium enterprises ("SMEs") in Australia. The Target Fund will look to purchase notes from special purpose vehicles, or units in managed investment schemes that hold the underlying loans originated by the originators. The Target Fund will also consider other investment methods as the market matures. Accordingly, the Target Fund will invest in a pool of eligible assets, primarily focused on debt issued by non-bank lenders and/or other forms of debt including senior debt, asset backed securities, unlisted securities and loans via peer-to-peer lending platforms. As loans are repaid and cash is realized, the manager of the Target Fund will determine what amount to make available for redemptions and otherwise will re-invest cash available in the Target Fund in accordance with the Target Fund's investment objective.

As the Fund is a feeder fund, the Fund will stay invested in the Target Fund as long as the Target Fund's investment objective and strategies will enable the Fund to meet its investment objective. Nevertheless, during adverse market conditions and/or at the Manager's discretion, the Manager may take a position which may be inconsistent with the Fund's strategy and asset allocation by reducing its investment into the Target Fund.
